

DynEd Pro English Certification

Academic II Plan

Goal-based learning designed for middle and high school English language learners (ELLs)

DynEd's Academic II Certification Plan features a goal-based English learning approach for your middle and high school students. This plan provides both students and teachers with a clear study path that is established from the moment they take DynEd's Placement Test, and as they advance through the Plan.

- ✓ DynEd's technology-adaptive Placement Test ensures that students begin studying at a level that is right for them, reducing the boredom or frustration that many young ELLs experience when forced to study at the wrong level.
- ✓ DynEd's Academic II Plan allows students to gain confidence in their written and verbal abilities quickly, so that they are able to join the mainstream classroom up to 50% faster than with traditional programs.
- ✓ The ten certification levels of the Academic II Plan are fully aligned to the Common European Framework of Reference for Languages (CEFR), providing program administrators, teachers, parents and students with the confidence that the proficiency level shown on certificates is a true representation of the student's English language ability.
- ✓ DynEd's advanced Analytics tool provides school directors or administrators with real time access to every interaction that a student has in the Academic II Plan, providing them with an easy and effective way to measure progress for all ELLs in their programs.
- ✓ A complete teacher training program and a detailed scope and sequence facilitate the adoption of the Academic II Plan.
- ✓ Easily accessible technical and academic support ensures that students achieve their yearly goals as efficiently as possible.
- ✓ Students can follow their progress and get the extra study time they need from DynEd's mobile apps—*DynEd Pro* and *MyDynEd*.

Academic II Plan Course Descriptions

First English is an award-winning English language course for beginners. It has been designed specifically to help young students succeed in a school setting. The course starts at a beginner level and systematically helps students comprehend, practice, build and internalize the core framework of English necessary for long-term academic success. DynEd's innovative use of visuals and comprehension exercises engages the learner in ways that a text-based approach cannot.

English For Success is an award-winning, research-based English language course for students who need to use English in school. The course includes content areas such as math, science, geography, and history. This pioneering course prepares students for a full academic curriculum in English. When used in conjunction with *Reading for Success*, it becomes a powerful fluency accelerator that will quickly get your ELLs into the mainstream classrooms.

Reading for Success is designed to develop academic reading skills and vocabulary for ELLs who have already developed basic oral fluency. The course challenges learners by increasing text difficulty as they advance through the course. Reading and chunking are reinforced through synchronized audio, and speech-recognition exercises help students develop their oral reading skills. Learners are motivated by the game-based strategies implemented throughout the course, including timed exercises that lead to rapid text decoding.

English by the Numbers guides learners to achieve fluency with mathematical concepts, giving them the confidence they need to talk about calculations, data, graphs, and other quantitative information essential to mainstream math and science courses.

New Dynamic English is a general English course that develops the conceptual and structural language skills necessary for English fluency. It focuses on language that is immediately useful and prepares learners to incorporate new vocabulary and phrases into their language base. *New Dynamic English* follows a syllabus that helps students acquire English as a skill they can use with confidence in school and in their careers.

Advanced Listening is a strategy-based listening course for advanced ELLs built around authentic lectures from Stanford University professors. Interactive lessons include video segments of real presentations from some of Stanford's best lecturers, and are designed to strengthen listening strategies, academic vocabulary, and critical thinking.

Dialogue, a supplementary English course focused on televised interviews originally broadcast on China Central Television (CCTV), provides advanced content that helps higher-level learners prepare for class lectures, discussion groups, conferences, and presentations in English.
